

## 8 Ways the PingMaster5000 Will Help You Reduce Costs, Monitor Inventory, and Improve Repo Recovery Rates

### 1 **AUDIT INVENTORY REMOTELY**

Remotely see the exact location of each trailer, and see if it is moving or parked (and for how long). Dramatically reduce auditing travel costs and staff hours, while providing real-time and historical monitoring, rather than only when your employee visits that dealership.

### 2 **REDUCE ERRORS & FRAUD**

Monitor trailer sales and dealer transparency, instantly catch errors or fraud, and see if each trailer is on the sales lot or elsewhere.

### 3 **INCREASE THEFT-RECOVERY RATES**

When dealerships or owners report a theft, easily increase the tracker's ping frequency to Aggressive Mode, which gives reports every 7-8 minutes of the trailer's location, speed and direction and send those reports to the police.

# 8 Ways the Pingmaster5000 Will Help You Reduce Costs, Monitor Inventory, and Improve Repo Recovery Rates

## 4 LOWER REPO COSTS & TIME

Reduce repo costs and inefficiencies with instant motion-alerts and aggressive location tracking. Homebase Verification will alert you if a trailer rarely/never is at a customer's stated address.

## 5 SET GEOFENCE ALERTS FOR NO-GO AREAS

Create a virtual geofence to receive an alert if a tracker enters or leaves an area that would violate the finance agreement, such as the US-Canada or US-Mexico land border.

## 6 ANONYMIZED DATA

Receive Data insights from (anonymized) data to see valuable information and trends about your trailers and customers. Use this data to improve your repo process, marketing plans, insurance and warranties, and to tailor your financing agreement to your customers' needs.

## 7 FINANCE THE COST OF THE TRACKER

We can work with you to finance the cost of the trackers, or share the cost with the trailer manufacturers and dealerships who you work the most closely with.

## 8 FLOOR PLAN LENDERS

Monitor the movements of your inventory to track precisely when trailers arrive at the dealership and when they leave the lot. In cases of theft or repossession, reduce your costs of recovery.

## ABOUT US

15-Year Company Based in Silicon Valley  
1M Trackers Deployed

We Keep Costs Low because we design and manufacture all of our hardware and software. We can customize features to be highly responsive to your needs and interests. We have experience working with accounts with tens of thousands of trackers.

## »»» NEXT STEPS

We can give you a few demo trackers to test on your own, so you can learn more about their features and benefits firsthand.
